VP / DIRECTOR - MEDICAL AFFAIRS / HEALTHCARE SERVICES

**EMS / Operations / Administration / Accreditation / Regulatory Compliance / Training
Patient Care / Public Safety / Managed Care / Policies & Procedures / Marketing
Business Development / Strategic Planning / Program Management / Presentations
Communications / Startups / Negotiations**

Blending strategic thought leadership, medical acumen, business savvy and interpersonal skills, Dr. Barnett has consistently improved the delivery, quality and efficiency of healthcare services while maintaining regulatory compliance and accreditation, increasing health and safety and enhancing the patient experience. An active lecturer, keynote speaker, and educator, he has been called upon numerous times to impart his knowledge in both symposium and training settings.

His education is extensive and relevant. He earned his MD at the Health Science Center, Syracuse, College of Medicine of the State University of New York, and his BS in Biology, with a minor in Chemistry, from New York University. His Internship and Residency in Emergency Medicine were both at Thomas Jefferson University Hospital and Trauma Center in Philadelphia. Rare in his field, Dr. Barnett also earned an Executive MBA at Rutgers, The State University of New Jersey. He is licensed to practice as a Medical Physician and Surgeon in New Jersey, Pennsylvania and Florida.

A hands-on leader, administrator and mentor with extensive disaster relief planning, medical staff leadership, and clinical practice experience, Dr. Barnett has a record of significant success in all areas of healthcare, with a wide-range of achievements in Emergency Medical Services, hospital administration, and medical command in public and private settings. His strong healthcare insights and analytical, communication, change management, and collaborative skills, coupled with his experience in managing large staffs, provide a sound basis for his attainment of the executive level position he is seeking.

Dr. Barnett's numerous achievements, as well as the basis upon which he will continue to provide significant contributions in the future, have been and will be driven by the following skills: building and maintaining strong relationships with key stakeholders and opinion leaders . . . ensuring compliance with contractual, accreditation and regulatory requirements . . . developing effective programs and processes to meet healthcare cost and quality targets . . . maintaining currency with medical, scientific, regulatory and industry advances . . . and leading interdepartmental integration and collaboration to enhance patient care needs.

Dr. Barnett is an enthusiastic, creative executive, with effective communication skills and motivational abilities that exude loyalty, professionalism and commitment to excellence. He is adept at achieving buy-in from disparate groups and cultures, creating common vision and consensus. He is particularly proficient at reorganizing and revitalizing complex organizations and turning around under-performing operations.

A result-oriented, winning-team builder and effective communicator, Dr. Barnett has demonstrated the ability to establish and maintain C-Level relationships, reengineer processes and develop multi-functional teams to support strategic initiatives and produce meaningful and measurable growth and success throughout his professional career. Skilled at managing daily operations while maintaining a “big picture” perspective, Dr. Barnett excels at leveraging business knowledge with a tireless work ethic to deliver results.

Dr. Barnett’s diverse and progressive career path has provided him with a broad based perspective and a wealth of experience and knowledge. Starting with his early tenure as an Emergency Medicine and Base Command Physician in two hospitals, through Director and Chairmanship positions in numerous hospital departments and Medical Command positions for a wide range of transport companies, up to his current positions as a Medical Director for a municipality, and the founder and principal in an EMS Consultancy, Dr. Barnett has provided strong strategic and tactical leadership everywhere he has been.

His highly developed skills and boundless energy have ensured him success and have allowed him to move progressively into positions involving more responsibility and authority. His intuition and passion, which have been the driving forces behind many of his successes, elevate his energy level and heighten his personal satisfaction, causing him to constantly seek more challenging opportunities.

CAREER SUMMARY

Dean for the EMS Program, Philadelphia Job Corp Center, 2012-Present.

Oversees and develops EMS educational program for EMT training at Philadelphia Job Corp Center. Facilitates interaction with Philadelphia and Commonwealth Regional EMS Councils and on-site hospital training for EMT candidates. Manages skill testing compliance in adherence with NREMT standards.

- **Developed most successful Job Corp EMT Certification program.** Collaborated with Regional EMS Council to determine personnel requirements and needs. Brought on program director and EMS education coordinator. Created and implemented program, based on national standards, to help students obtain EMT certification.

Medical Director, Municipal Emergency, Medical Services, 2012-Present.

Oversees EMS system of ~120 (30 employees/90 active volunteers) and seven ambulances/mass casualty trailers, as well as resources for police and fire departments, in delivery of emergency services (4,800+ calls/year) for Philadelphia suburb Township of Mount Laurel, NJ (population: 42,000).

- **Standardized key protocols across disparate county EMS/pre-hospital systems.** Protocols of county EMS systems were inconsistent, particularly those involving spinal cord injury management. Fostered communication between county medical directors for addressing of protocol updates and issues.
- **Developed and implemented effective Taser injury training program.** Partnered with local police to provide education on risk of/injuries related to Tasers for PD and EMS. Featured in CBS Evening news expert interview and Gloucester County EMS/Rowan University EMS Clinical Education Symposium on Taser incidents.

Founder/Principal, EMS Consultant Group, 2010-Present.

Provide staffing solutions, educational programs, protocol development, administrative assistance, medical direction, QA screening services, compliance, training and independent medical review for insurance liability protection to public and private safety and EMS companies. Grew business to 13 primary private ALS transport clients, providing 65K+ ambulance transports annually.

- **Eliminated client Medicare/Medicaid fraud issues.** Created educational programs and training procedures on latest events, equipment and PA protocols in environment of scrutiny for high levels (\$15M+) of Medicare/Medicaid fraud cases. Clients experienced zero issues.
- **Developed and submitted promising RFQ response for EMS protocol standardization.** Office of EMS in Washoe County, Nevada, was unable to standardize protocols. Approached to produce RFQ on current protocols and unification/standardization with National Standards as guidelines. Told bid has been accepted

Emergency Medicine Physician, Lourdes Medical Center, 2005-Present.

Provided emergency care in psychiatric evaluation facility for entire county and regional rape crisis center in Burlington County, NJ. Concurrently, Lourdes is a STEMI and certified Stroke Center.

- **Based on reputation as physician with education and 911 experience, delivered the following:**
 - Detailed lecture at "What's up Doc," at Deborah heart and Lung Center Pulmonary Medicine conference, held at Independence Seaport Museum in Philadelphia.
 - EMS Director Panel Participant March 2014, Gloucester County EMS/Rowan University EMS Clinical Education Symposium.

Chairman, Department of Emergency Medicine, Women's Medical Hospital, 2005.

Managed 100+ department of former Medical College of Philadelphia during period of restructuring after financial difficulties. Served on number of committees, including Chairman to Patient Safety Committee. Hospital closed March, 2005.

- **Maintained Department functionality during hospital financial restructuring and closing.** Political leaders had promised that funding would be found to keep hospital open. Provided departmental leadership for hospital (25,000 patients/1,000 in intensive care). Maintained fully functioning Emergency Department.
- **Provided safe transfer of critical patients with zero mortality incidents.** Due to limited resources and lack of funding, patient intake, which exceeded capabilities of ER, required transfer to other facilities to be stabilized. Established transport agreements with dedicated ambulances facilitating for transfer hundreds of patients.

Urgent Care physician, Atlanticare Urgent Care, 2004-2013.

Worked in Urgent Care clinics in South Eastern NJ. Named 2011 Top Performing Provider in Atlanticare Physician Group's Customer Service Survey.

Temple University Health System,***Associate Director of the Department of Emergency Medicine, 2000-2004.***

Northeastern Hospital Division. Accepted transfer during period of system-wide restructuring wherein Emergency Services at Northeastern hospital, and Emergency Department facilities in particular, were expanded. Additionally, Temple University increased its maternity and children's health services at this facility, thereby leading to increased patient volume and flow through the ER. Provided guidance and insight to hospital administration regarding various issues that affected patient flow and wellbeing through the Emergency Department and hospital.

- **Played key role developing protocols for ionizing radiation studies.** Provided Emergency Department representation to Radiation Safety Committee. Assisted with protocol development and review to facilitate patient and staff safety in compliance with Federal and regional ordinances and guidelines.
- **Instrumental in formation of Temple's T3 critical transport system.** Hospital sought to form in-house Ambulance system. Having been Medical Director for Network Ambulance from which Temple leased its trucks, assumed role as Interim Medical Command Director for Northeastern and Children's Hospital of Philadelphia.
- **Provision of lectures improved partnership between Philadelphia EMS and ER facility.** As part of establishing positive relationships, actively took part in Educational programs. Provided series of lectures at Philadelphia EMS Fire Academy, including April 2000, lecture series on Alcohol and Poisonings.
- **Coordinated and managed Stroke Care within hospital within Temple System.** Assumed role as representative for Northeastern Hospital as part of Temple Health System Neurosciences Task Force. Coordinated management from Northeastern Hospital to Temple Main for acute Neurosurgical pathology.
- **Provided training for WMD and terrorism events.** Only member of Division training with National Emergency Response and Rescue Certification for training in EMS Operations and Planning for WMD. Obtained training with TEEEX and Homeland Security and Certification for Continuity of Operations.

Interim Chairman, Department of Emergency Medicine, Episcopal Hospital, 2000.

Responsibility with Temple University in rebuilding Emergency Department in terms of staffing and resources and patient management during period of general restructuring of Temple Health System. Initiated process of revamping charting to improve compliance with HICFA guidelines and reverse pre-existing 90% down coding estimated by Healthcare Business Resources.

- **Acted as deputy Director of Emergency Department during period of system-wide restructuring:**
 - Made presentations and appeals to the medical staff assembly, in addition to Episcopal and Temple University administrations, to advocate for the needs of the Emergency Department patients and staff in order to keep the Emergency Department fully operational.
 - Coordinated as administrator-on-call for the transferring out of critically ill patients to other facilities having intensive care capabilities.
 - Rebuilt Emergency Department to 23,000 patient volume.

- Served as liaison to Philadelphia Republican National Convention 2000 EMS disaster planning committee.
- Created computerized software system with links to 5+ online specialized databases (Micromedex, Medline, Medscape).
- Instituted transition from handwritten English-only instructions to bilingual (Spanish) output of electronic patient discharges improving patient compliance for 90%+ Hispanic patient population and reducing physician liability.
- Oversaw reaccreditation of Episcopal as Base Command Facility.

Deputy Director of the Department of Emergency Medicine, 1999.

Also served as Base Command Physician to 23,000 volume urban community hospital and rape crisis center for City of Philadelphia. As a result, had to make presentations and appeals to the medical staff assembly, in addition to Episcopal and Temple University administrations, to advocate for needs of the Emergency Department patients and staff in order to keep the Emergency Department fully operational. Throughout this period, had been transitioning into the role of interim director pending the formation of a search committee by Temple Administration.

- **Served as consultant/representative to City of Philadelphia in event of disaster.** As major medical facility, Episcopal Hospital needed to prepare for disasters in light of Republican National Convention in 2000, in Philadelphia. Provided guidance as to surge capacity and resources hospital could offer city.
- **Spearheaded reaccreditation of Episcopal Hospital as Base Command Facility.** Philadelphia EMS lost accreditation as base command facility. Personally oversaw reapplication and instituted requirement for requisite training by all Emergency Department physicians, to reacquire Base Command status.
- **Maintained management of disease pathology post hospital unit closures.** Set up computerized onsite and online-reference library with hyper-links to various sites, including MEDLINE, MICROMEDEX, and various manuals for physician use in patient management. This significantly offset loss of various consultants
- **Upgraded and digitized of bilingual legacy patient discharges.** Handwritten charts and discharge instructions in English posed problems to Spanish-speaking patient population. Instituted from pre-existing handwritten instructions, thereby improving patient understanding/compliance and lowering physician liability.

Medical Command Director Independent Contractor, 1999-Present.

Provide Medical Director/Command services for wide range of medical transport hospitals and private ambulance companies looking to function as Advanced Life Support units.

Emergency Medicine/Base Command Physician, 1996-1999.

Emergency Medicine and Base Command Physician to West Jersey Health System (now Virtua) Mobile Intensive Care Units and Southstar - Southern New Jersey's Medical Support Helicopter. Functioned as an Emergency Physician in a 35,000 + annual volume ED. Provided medical command for all advanced life support activities in southwest New Jersey. Provided in field guidance to paramedics in both medical and trauma management. As Medical Command to Southstar, coordinated and provided medical direction for trauma transports as well as "on-scene" trauma management pending an "on air patch". Provided medical command for "IHOPs" of critically ill patients during their in-flight transfer to tertiary care centers in the Southern NJ and Philadelphia region.

- **Provided lectures on routine basis to residents and paramedics at West Jersey Voorhees and at UMDNJ Stratford Osteopathic Medical College:**
 - Toxicology - An Overview, Internal Medicine Residency, Episcopal Hospital, 2000.
 - The Emergency Care of the Neonate - Paramedic Management, National Registry Refresher Course. Sponsored by the Mobile Intensive Care Project of West Jersey Hospital System, 1999.
 - Bites and Burns - Trauma Management, Family Medicine Residence, West Jersey Voorhees Hospital, 1998
 - Toxicology - Poisoning Management, Family Medicine Residence, West Jersey Voorhees Hospital, 1996.
 - Managing Crisis Pain in the Emergency Department Setting, UMDNJ- Stratford Osteopathic Medical College, November, 1997, October 1998.
- **Significantly improved patient/customer satisfaction rate.** Served as member of Customer Service and Performance Improvement committee for Emergency Department at West Jersey Voorhees Hospital. Lowered customer complaints and addressed procedural issues.

Emergency Medicine Physician/Base Command Physician, 1995-1996.

Episcopal Hospital, Level II Trauma Center A 23000 volume single physician coverage facility.

Emergency Medicine Resident Physician, 1993-1996.

Thomas Jefferson University Hospital Trauma and Transfer Center, Trained for board specialization at this Level One trauma center in Central Philadelphia.
